

Switchgears

With over 80 years' experience, Callenberg Technology Group is a leading manufacturer of high quality main and emergency switchboards for the maritime & offshore markets.

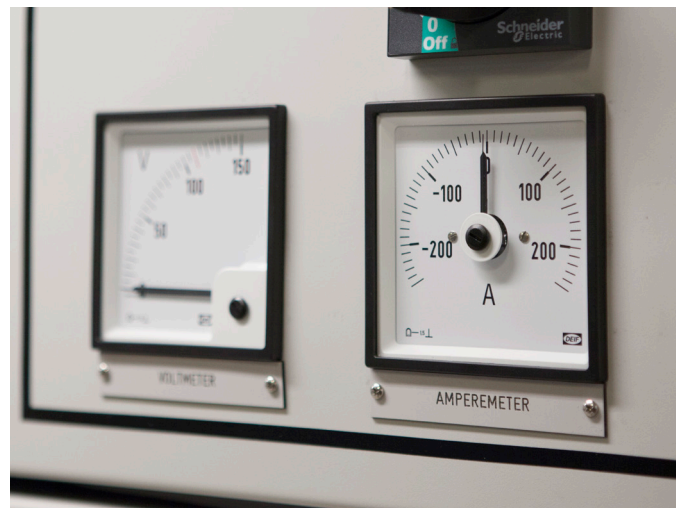

- Maritime and offshore power distribution solutions, from shore power to the on-board consumer
- In-house switchgear design, production, installation & commissioning
- Engineered for the harsh environmental demands of the maritime and offshore markets
- Flying squads and spares hubs support our customers globally

CALLENBERG.COM/CONTACT/

Brand independent

At our switchboard production facility in Denmark, we produce, test, install and commission switchboards for yards, ship owners, offshore and industrial installations.

We are brand independent - to support fast and cost effective operational maintenance, we design and engineer our solutions based on the requirements of the project and with components that are readily available world-wide.

Custom build switchboard solutions

Our range of high quality switchboard solutions includes;

- Main switchboards
- Emergency switchboards
- Starters
- Distribution panels
- Shore connections
- Electric propulsion lines
